

Service and Spares

- ⦿ Increased efficiency
- ⦿ Less production downtime
- ⦿ Reduced costs

Ensure Peak Performance

All industrial air filtration and extraction equipment performs best with regular preventative maintenance.

Filtermist provides routine service plans freeing you up to concentrate on your business, as well as an emergency callout service designed to keep production downtime to a minimum.

Protecting People
Cleaner, safer, more
productive workshops

Service

Filtermist has a team of qualified engineers who undertake regular training to ensure they're up to date with the latest HSE requirements.

Our engineers cover the whole of the UK. So whether you're based in Land's End or John O'Groats – we're at your service.

We don't just service Filtermist units...

...we service **all makes & models** of oil mist, dust, smoke and fume extraction equipment

Red lights?
It's time to call our Service Team

Digital service reports

Filtermist engineers log all details of their visit using a digital tablet. Risk assessments, method statements, and service sheets can be in your inbox before our engineer has even arrived at his next job.

- ✔ Less paperwork
- ✔ Easy to file and find when needed

If you can't find the it's not Filtermist

Filtermist engineers only use genuine parts approved by us. Our dedicated Service Division arranges delivery of Filtermist spares kits prior to all engineer visits so every job can be completed as scheduled.

F Monitor

Not sure if your Filtermist is performing properly?

Suitable for use with a wide range of oil mist, dust, smoke and fume extraction equipment, F Monitor from Filtermist uses coloured warning lights to alert machine operators to any potential issues.

If you want the security of knowing when your extraction equipment needs servicing, Filtermist can retrofit F Monitors and Pressure Gauges to monitor air flow and pressure – eliminating guesswork.
