

First Announcement

ECTA Conference 2022
Zürich June 30th – July 2nd

SAVE THE DATE

Thomas Nägelin
Chairman of Swissmem Precision Tools

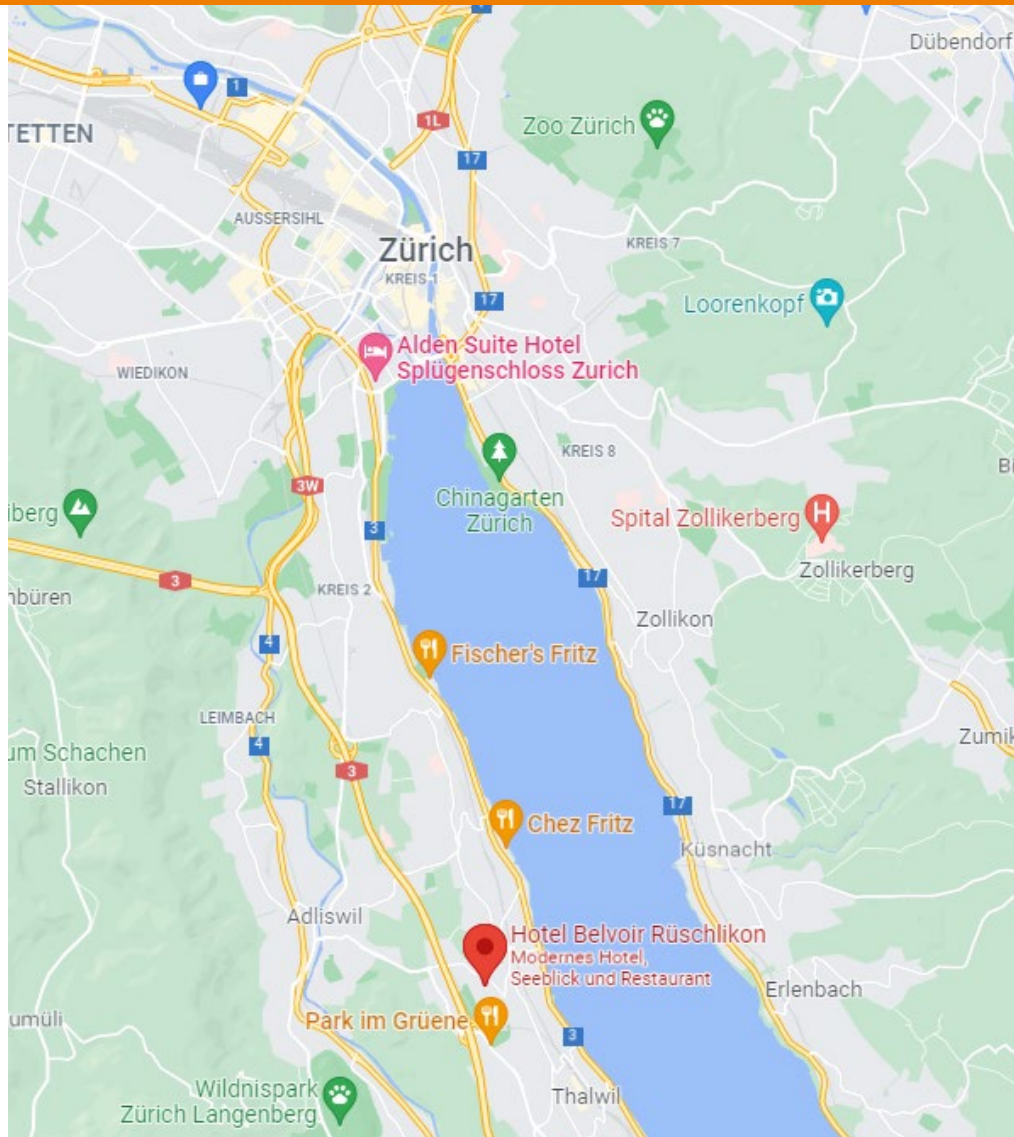

Invitation

On behalf of ECTA and Swissmem, as host, I am pleased to cordially invite you to the ECTA Conference 2022.

We hope to bring together as many stakeholders of the cutting tool industry. Constant automation, digitalisation and the high competition in the international markets challenges our enterprises every day and drives us to highest standards and technology leadership. In addition, the hurdle with the pandemic for two years does not make it any easier. Nevertheless, or precisely because of this, it is important for the industry to meet for an exchange.

We have spared no effort to put together a top-class programme for you and your partners. With the selection of high-ranking speakers on top actual topics and an outstanding side programme, we hope to create the best atmosphere for good discussions and to expand your network activities.

We look forward to welcoming you in Zurich from June 30 to July 2, 2022.

The venue

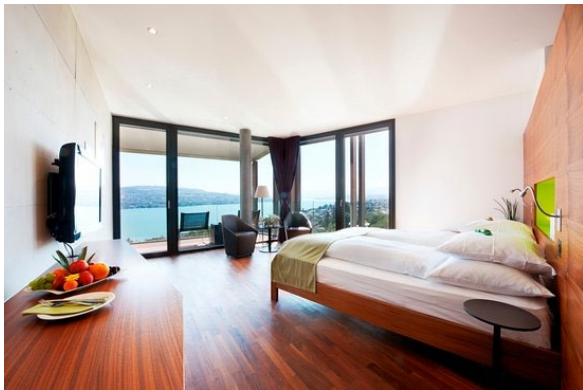

The conference takes place in Rueschlikon, a small town at the lake of Zurich, 20 minutes away from Zurich, the largest city in Switzerland. 30 minutes away from the airport by taxi and approx 1 hour by public transport, which is considered excellent in Zurich.

The Hotel Belvoir Rüslikon

The cosy and yet stylish 4-star hotel with a breathtaking view of Lake Zurich offers excellent facilities for the conference and the entire stay.
