Why renew filter media?

Investing in cost effective and quality filter products suitable for your application can help you avoid common problems such as preventable downtime of machines, employee health and safety issues and shortened machine life.

Buy from the experts

As an operating division of Filtermist, Direct Filtration is backed by more than 45 years' experience in **industrial filtration**.

Our extensive industry experience and technical expertise can help you achieve significant **cost savings & operational improvements**.

When you buy from us, you're not just buying filter rolls and filter media – you're also tapping into our **knowledge and know-how**.

Reduced Cost

Cleaner Working Environment

Reduced Machine Downtime

Longer Coolant Life

➤ Filter out the rest and buy from the best!

DIRECT >> FILTRATION

Direct Filtration specialises in supplying a broad range of quality, competitively priced filter products for applications including **grinding, honing, lapping, cutting and much more.**

Our range includes:

Process Fluid Filtration

NON-WOVEN		Filter Rolls are extensively used for machine tool coolants, cutting and lubricating fluids found throughout the metalworking industry.	<ul style="list-style-type: none"> • Viscose • Polypropylene needle felt • Polyester needle felt • Blends
DEPTH FILTERS		Melt blown, spun bonded and wound filter cartridges ideal for removing a range of particulate sizes.	<ul style="list-style-type: none"> • Wound cotton • Wound polypropylene • Meltblown spunbonded
PLEATED CARTRIDGES		Pleated depth and membrane cartridges for finer, absolute rated filtration in 10-40" with a range of end caps.	<ul style="list-style-type: none"> • Membrane • Glass fibre • Polypropylene
BAGS		Filters ideal for high flow rates and coarser grade particulates in a range of materials and sizes to suit.	<ul style="list-style-type: none"> • Polypropylene • Polyester • Nylon
HOUSINGS		Manufactured in stainless steel, plastic or special materials we have a filter housing to suit even the most demanding process conditions.	<ul style="list-style-type: none"> • Bag housings • Cartridge housings

Air Filtration

SYNTHETIC MEDIAS		Blue and white air filter rolls are used for the removal of airborne particulates. Applications include air conditioning and ventilation environments. The rolls are thermally bonded from synthetic fibres to EN 779 efficiency G4 grade. Glass fibre air filter media is used as a primary filter in Spray Booths. This media can be purchased in various widths and sizes - EN 779 efficiency.
PAINTSTOP		Our Paintstop glassfibre media is ideal for use in the collection of paint overspray. Our high quality continuous filament glassfibre media is produced using computer controlled, spun bonded technology.
POCKET BAGS		Multi pocket bag filtration is available from grades G3 to F8/9, used in air conditioning applications and in pre-filter applications. Robust metal header frame, available in a range of standard sizes, low energy costs, high efficiency, with a large surface area. EN 779 efficiency.
RIGID BAGS		Sturdy and compact rigid bag filters, easy to install, designed for similar applications as our pocket bag filters. Polypropylene frame, light weight robust construction has a great dust capacity. EN 779 efficiency from grade F6 – F9.
PLEATED PANELS		Disposable filter panels for general heating, ventilation and air conditioning applications, rigid cardboard frame, unique V pleat design provides an extended dust holding capacity. Comprehensive range of standard and non-standard sizes. EN 779 efficiency from grade G4 – F9.
